Re: CC Docket No. 95-116
WLNP Implementation Difficulties in MSA No. 27 - San Juan, Puerto Rico

Dear Mr. Muleta:

I am writing on behalf of Centennial Communications Corp. ("Centennial"), the parent of Centennial Puerto Rico License Corp., licensee of PCS Station KNLF250, which provides PCS in the Puerto Rico-US Virgin Islands MTA. Centennial wants to apprise the FCC of an issue that has arisen in Puerto Rico that is seriously affecting Centennial's ability to implement wireless local number portability in that market, and to request any assistance that the Commission might be able to provide in resolving this issue.

As the Commission is aware, the CMRS industry primarily relies on two different private companies to handle the preporting LNP coordination process between the carriers. These two coordinators are Telecomm Services Inc. ("TSI") and NightFire (the assets of which apparently were acquired recently by NeuStar). While Centennial has contracted for preporting coordination services with NightFire, five out of the top six CMRS carriers in the US are utilizing TSI for preporting coordination services.

Beginning on Tuesday, November 25, 2003, Centennial began experiencing difficulty in processing both in-coming and out-going porting requests. It has come to our attention that, at least in the Puerto Rico market, TSI is experiencing significant operational difficulties, which is resulting in Centennial being unable to process porting requests. For significant portions of the day on Tuesday, TSI's system was down, at which time porting requests could not be processed. As of this afternoon, Centennial's ability to process porting requests to or from carriers who use TSI for porting coordination has been *severely* limited.

Consequently, Centennial is bringing this matter to the Commission's attention for two reasons: first, to notify the Commission that is unable to fully implement LNP in the Puerto Rico MSA, for reasons outside of its control; and second, to request that the Commission take any appropriate action to assist in resolving this issue.

If you would like additional information regarding this situation, please contact Marilyn Foshee, Vice President of Operations for Centennial de Puerto Rico, at 787-717-1200.

Sincerely,

/s/ Theresa Z. Cavanaugh
